

Intellicorp - LiveCompare

Intelligent lifecycle optimization

What UCS offers:

- **Integrated Service Management**

The hub of our business. Service delivery management and a 24 x 7 Customer Contact Centre

- **Managed Services**

A broad portfolio of application and infrastructure services

- **Business Solutions**

Customised solutions for better business performance

LiveCompare Key Facts:

- Automatic SAP impact analysis
- Unmatched analysis of all custom code, configuration and data
- Supports all SAP ABAP and JAVA modules across all industry solutions
- SAP Certified

Why LiveCompare?

- One tool to cover the WHOLE SAP lifecycle
- Drastically reduce the cost of SAP maintenance
- Eliminate production failures
- Eliminate compliance violations
- Keep business operations running
- Gain more value from SAP investments
- Reduce manual effort
- Free up resources
- Easy to customize
- Use with your SIs and consultants

"Instead of testing everything, we test only what's impacted. That has translated into direct resource savings of 30-40%"

The Coca-Cola Company

Revolutionizing SAP® Ownership

IntelliCorp's intelligent lifecycle optimization software completely revolutionizes how companies manage their SAP lifecycle. From audits to upgrades, LiveCompare automates the analysis of every change and clearly identifies the impact on business critical functionality. LiveCompare's benefits are proven in more than 35% of the Fortune 500 companies that run SAP to reduce cost, reduce effort, reduce risk and improve quality across the whole SAP lifecycle. You have questions, LiveCompare has the answers.

- Upgrades
- Enhancement Packs
- Support Packs and Stacks
- Custom Developments
- Synchronization
- Dual Maintenance
- HCM, SRM, BW , CRM, APO
- JAVA Analysis
- Audit, Security & Compliance
- Master Data Management
- Consolidation

I have a specific requirement...

- If you are upgrading or implementing the latest Enhancement Pack, LiveCompare's dedicated analyses will identify the project scope automatically.
- If you want to synchronize changes across a sophisticated SAP BW environment then LiveCompare's specialist BW functionality gives you the tools to succeed.
- If you're moving to implement SAP Support Stacks (which are 100 times larger than traditional Support Packs) then LiveCompare's high-performance Support Stack Impact Analysis means you'll get accurate results in just a few hours.
- If you need to read half-a-billion records to support a forensic financial audit then LiveCompare's specialist 'big data' functionality will handle it.
- If you need to compare the latest ABAP Web Dynpro customizations then you need LiveCompare.
- If you need to compare your custom Java components then LiveCompare can help.
- If you want to do all your SAP lifecycle analytics in one tool then you need LiveCompare!

"LiveCompare ensures we're testing the right things and spending resources in the right places"

Coca-Cola

FAQs

- **We work with a consultant or Systems Integrator. Why should we consider using LiveCompare?**

LiveCompare creates a transparent environment where customers and SI/consultant partners benefit alike. Clearer communication about what's to be changed and the subsequent impact on critical business functionality help both the SI/consultant responsible for its implementation and the customer team responsible for its validation. Many SIs client teams use LiveCompare today.

- **We don't have a project, can we still use LiveCompare?**

Yes! While many of our customers started by licensing LiveCompare for a specific project they quickly realized its potential to support their whole SAP lifecycle, including every-day operations. Customers such as Coca-Cola, Vodafone and Hershey's use LiveCompare every day.

- **We use SAP's tools. Why should we consider LiveCompare?**

LiveCompare provides a single, unified interface to total lifecycle management. Its analysis goes deeper to support a broader range of lifecycle activities. In many instances, LiveCompare is used in conjunction with SAP tools, for example, the CHaRM module of Solution Manager. You do not need Solution Manager implemented before using LiveCompare.

- **Can we provide high-level reports to the business?**

Yes. LiveCompare reports can be distributed across the business without the need for business users to be trained on LiveCompare.

- **How much effort is required to get LiveCompare up and running?**

It takes less than one hour to install and set-up LiveCompare. You do not need training or additional consulting. Your first results will be available in less than a day.

- **What support is given? What if we run into problems?**

Support is included as part of your software assurance. Our standard of support is often highlighted by customers as a standout quality of doing business with IntelliCorp.

- **We have a specific challenge which isn't covered here. Can LiveCompare still help?**

The flexibility, power and ease-of-use of LiveCompare means you can quickly customize the analysis workflows to answer specific lifecycle questions and address new challenges. You'll find many examples of this on our iShare community site.

"IntelliCorp's software was one of the easiest implementations I've experienced and the company was very responsive"

Bentley

Who Should be Interested in LiveCompare?

- CEOs who want to lower business costs, increase revenue, improve productivity and customer satisfaction
- CIOs and IT Directors who want to lower their SAP Total Cost of Ownership
- SAP managers who want to reduce time and manual effort involved with impact analysis
- Basis Engineers and Managers who want to speed-up daily operations
- SAP Testers who want to save time and improve quality
- Audit and Finance people who want to adopt a forensic approach to financial audits and gain access to critical SAP data
- Functional specialists who want to implement changes faster
